10 Financia Challenges for ns Year

CHALLENGE #1

Set 5 financial goals for the next year, the next 3 years and the next 5 years.

You pick your time horizons. Make this work for you. Financial goals are not necessarily just about money. They can be about your work or school. They can be about habits and behaviors.

The key is that if you can improve your habits and behaviors, if you can improve your satisfaction at work and at school, you will feel more empowered to take control over your financial situation, too.

CHALLENGE #2

Stop spending money after a certain time at night.

I'm an early bird, so I don't spend any money after 8pm. Occasionally, I have to make an exception if I'm at dinner with friends, but having this mentality prevents me from making frivolous purchases that do not bring me much joy.

Maybe a daily deadline won't work for you; what about picking 1 day a week where you won't buy anything? Pick a goal that challenges you a bit, that brings you some benefit, but doesn't force you to sacrifice your lifestyle too much.

CHALLENGE #4

As soon as you get each paycheck, or on the 1st day of each month, explicitly save \$25.

Maybe that means moving \$25 from your checking or debit account to a savings account. And then do not touch that money. The goal is to get in the habit of paying yourself first (or paying your future self first). And a side benefit is that you will have separate financial accounts, each with separate financial goals.

CHALLENGE#5

Make saving a game.

After saving \$25 on the first day of the month, set a goal to save even more during the rest of the month. Maybe you set the goal of saving another \$50. If you manage to save \$150 instead of \$50, celebrate your success by taking the additional \$100 and using some of it to treat yourself. Maybe it's a spa day or a nice dinner – and then take what's leftover from this treat and put it towards savings.

CHALLENGE#5 - Alternative

Make saving a game.

Anytime you treat yourself to a purchase over a certain amount, set aside ½ of the amount amount of the purchase to give to charity. For me, it's \$200.

If I buy anything over \$200 – except food or rent – I immediately set aside ½ of the amount to give to charity. I do not donate the money immediately, but I may pool it over several months to be able to give a bigger donation.

CHALLENGE #6

Check your credit score. And study your credit report.

You can get a credit report for free from TransUnion, Equifax or Experian. Make sure what's on the credit report belongs to you. Challenge anything that is wrong. And make a plan to improve your credit score – by cleaning up your credit report or establishing a payment history that will work to your advantage over time.

CHALLENGE #7

Analyze your insurance expenses at least once a year. Contact 3 different insurance companies and compare pricing.

It's easy to stick with the same company for years. But you may be missing out on the best pricing. It's easy to switch companies, so don't be afra

CHALLENGE #8 - Alternative

Are you expecting a tax refund this year? If so, get rid of it.

Note, the one exception I may make depends on your behavior: if you get that \$2400 refund, are you going to use this to invest or pay off debt? If so, then getting a refund may make sense. But if you view a

CHALLENGE #9

Cancel (at least) one subscription this year.

Look through your recurring subscriptions that automatically charge your credit card or deduct money from your bank account and think about (a) whether you really need that subscription, and (b) whether you would be better off just paying a-la-carte instead of with the subscription.

For me, I had a \$32 monthly car wash subscription; I could wash my car all I wanted every month for \$32. Well, in reality, I only need my car washed once or twice a month – especially as I'm driving less these days. So I got rid of the subscription. I still wash my car at the same place, but now I spend \$10-\$20 a month instead of the fixed \$32 a month. It may not be a huge savings, but it's more about the habit and the ownership of my spending.

Final Question of the Day

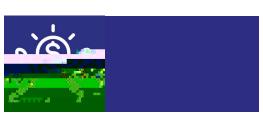

Why are you in graduate school?

are giving up several years, thousands of dollars and enormous effort & energy.

What return are you getting from this investment?

	WWThen a second second			-
